CHAPTER 7

Dopamine Systems in the Cingulate Gyrus: Organization, Development, and Neurotoxic Vulnerability

Michael W. Miller, Teresa A. Powrozek, and Brent A. Vogt

Chapter contents

Goals of This Chapter 164
Dopamine System Organization 165
   Sites of origin 165
   General organization 166
   Cingulum bundle 166
   Area and laminar terminations 168
   Synaptology 170
Dopamine Receptor Model of Cingulate-Prefrontal Information Processing 171
Dopamine and COMT-Genotype Regulation of Cingulate-mediated Functions 172
Development of Dopaminergic Systems 173
   First wave of innervation 173
   Second wave of innervation 173
Role of dopamine in cell proliferation 175
   Neurite outgrowth 176
Studies of Abnormal Development 176
   Toxin-induced monoaminergic reorganization 176
   Exposure to drugs of abuse: Cocaine 176
   Exposure to drugs of abuse: Ethanol 178
Prenatal Ethanol Exposure: A Monkey Model 178
Dopamine-mediated Cingulate Functions, Development, and Vulnerability to Toxic Insults 179
Acknowledgements 181
References 181
