CHAPTER 10

Visceral Circuits and Cingulate-Mediated Autonomic Functions

Brent A. Vogt and Stuart W.G. Derbyshire

Chapter contents

Goals of This Chapter 220
Electrically Evoked Autonomic Activity 221
Visceral Sensory Afferents 221
  Baroreceptor afferents 221
  Mechanical and chemical afferents 222
  Taste 223
  Nociceptive visceral afferents 224
  Visceral nociceptive circuitry 225
Efferent Cingulate Projections Regulate Autonomic Output 226
Micturition 228
  Circuit model 228
  Clinical intervention with biofeedback 228

Visceral Response Paradox #1: ACC “versus” MCC 228
Visceral Response Paradox #2: ACC “versus” PCC 230
Body orientation to visceral activity and pain 230
  A thalamic mechanism 231
Multiple Roles of Cingulate Cortex in Visceral Integration 231
Acknowledgements 232
References 232
