

## CHAPTER 25

# Cingulate Neuropathological Substrates of Depression

Brent A. Vogt, K. Nikos Fountoulakis,  
Dimitrios Samaras, Enikö Kövari,  
Leslie J. Vogt, and Patrick R. Hof

### Chapter contents

<b>Biological Models and Cingulate Cortex</b> 538	<b>Regulating Amyloid Deposition as a Therapeutic Approach to Depression</b> 552
Depression-vulnerable network 539	
<b>Goals of This Chapter</b> 539	<b>Neurodegeneration in Depression</b> 552
<b>Overview</b> 541	Bipolar disorder 553
<b>Cingulate Histopathological Hypotheses</b> 541	Major depression 553
Regional involvements and hypotheses 541	<b>Summary of Neuron Loss by Clinical Subgroup</b> 555
Laminar damage and hypotheses 542	<b>Neuron Loss in Posterior Cingulate Cortex</b> 556
Glia and inflammatory responses 543	<b>Neuron Shrinkage</b> 557
<b>Normal Cytology of Subgenual Anterior Cingulate Cortex</b> 543	<b>Neuron Shrinkage, Glia, and Active Neuropil</b> 558
<b>Survey of Cingulate Cortex in Postmortem Depression Cases</b> 545	<b>Regulating Inflammation as a Therapeutic Approach to Depression</b> 559
Cingulate tissues 545	<b>Circuit Consequences of Neurodegeneration in Depression</b> 559
<b>Overview of methods</b> 545	Amygdala-ACC interactions via layer II 560
<b>Two Laminar and Neuronal Patterns of Age-linked Amyloid-<math>\beta</math> 42 Peptide Deposition</b> 546	Neurodegeneration in layer V: Impact should be on subcortical motor systems 561
Age preference 546	<b>Drug Therapeutics in the Context of Cingulate Pathology</b> 561
Intraneuronal A $\beta$ 42 546	Serotonergic system 563
A key transition: Case 13 547	GABAergic system 563
Plaque A $\beta$ 42 548	Progressive neurodegeneration: A hurdle for drug therapeutics 564
<b>Plaque A<math>\beta</math>42 Deposition in Posterior Cingulate Cortex</b> 549	<b>References</b> 564
<b>Amyloid-<math>\beta</math> Peptides in Depression: An Aging Dimension</b> 550
