Altered Processing of Valence and Significance-Coded Information in the Psychopathic Cingulate Gyrus

Brent A. Vogt and Richard D. Lane

Chapter contents

Implicit and Explicit Aspects of Emotion 572
Cingulate Activations During Explicit Emotion 573
Goals of This Chapter 574
Cingulate Dysfunction in Psychopathy 574
Cingulate Subregional Inactivations in Psychopathy 575
Cingulate Structure/Dysfunction Correlates 576
Autonomic control and emotional information 576
Significance, valence, and context-dependent sensation 576
Decision making, planning, and avoidance 577
Empathy and the pain neuromatrix 577
Language deficits 578
Altered Information Flows into and Through the Cingulate Gyrus: An Information-Processing Impairment Theory of Psychopathy 579
Serial processing of emotion through cingulate cortex 580
Context-dependent sensory afferent failure: vPCC 581
Altered output functions 581
Summary of the Role of Cingulate Cortex in the Functional Anatomy of Psychopathic Behavior 582
References 583
