1

Remove all 5 screws from the top part (A).

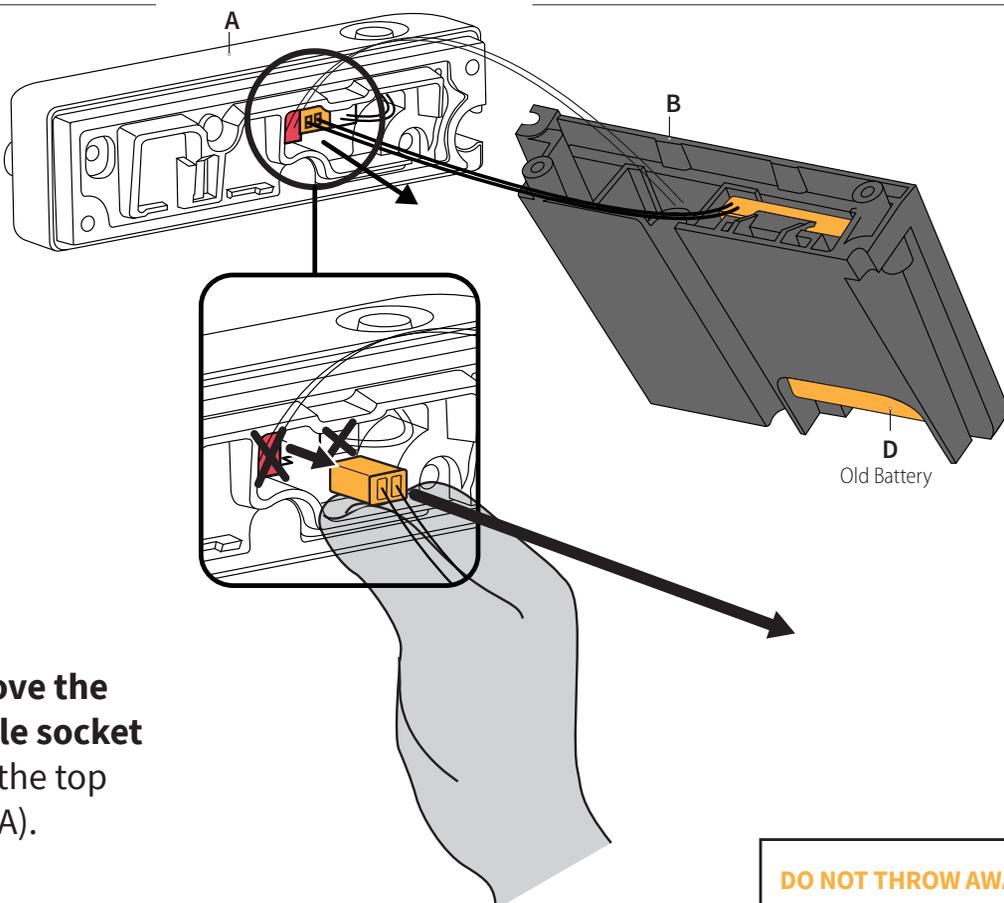

2

Pull top part (A) away from the bottom part (C) to expose the inner panel (B).

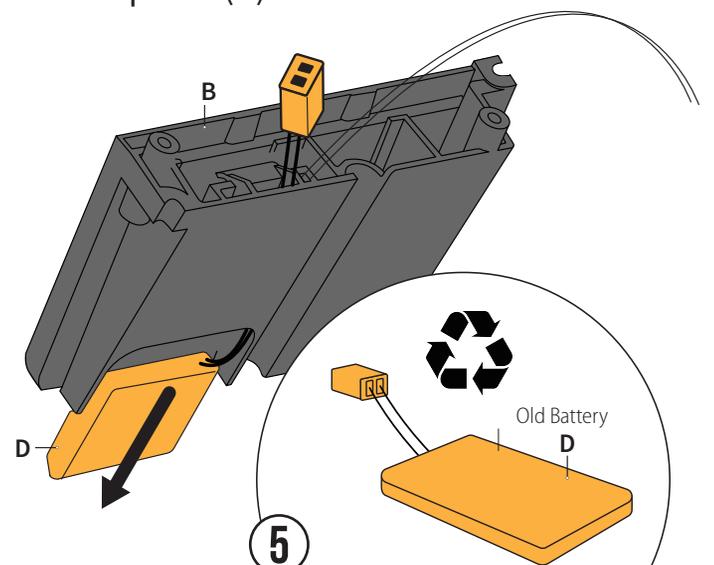

3

Remove the middle socket from the top part (A).

4

Slide the old battery (D) out of the inner panel (B).

5

Recycle the old battery (D).

DO NOT THROW AWAY YOUR LI-ION BATTERY.

Recycle (and purchase) your Li-ion batteries at Best Buy, Home Depot, Lowes, or Staples.

Or, go to call2recycle.org to find other locations that will recycle the batteries.

6

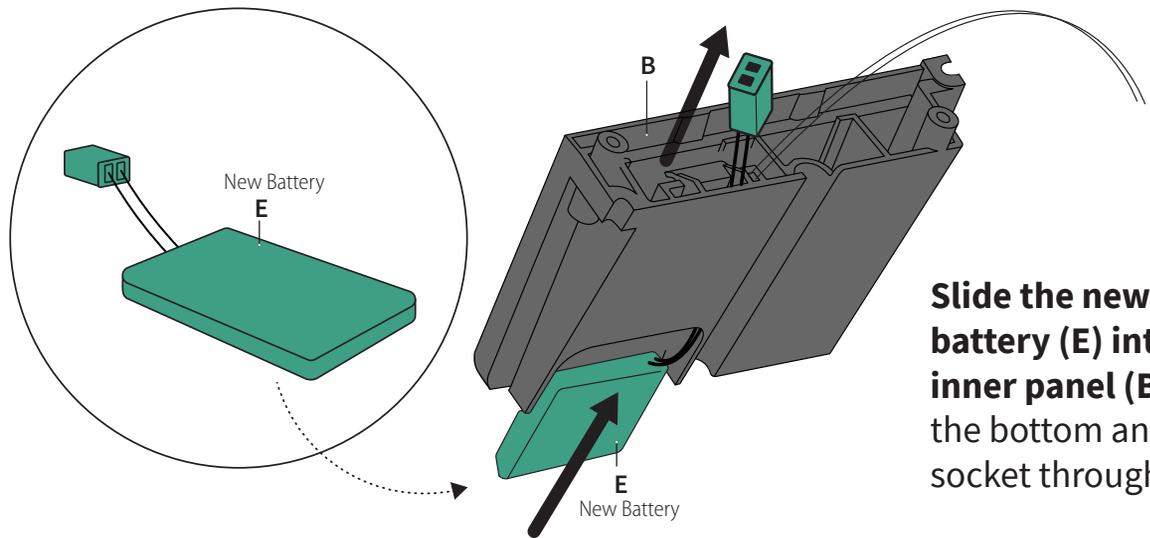

Replace with a new Li-ion battery (E).

New, Replacement Li-ion Battery Specs:

Rechargeable 3.7V Lithium-ion Battery 600mAh
Size 40 x 30 x 5mm

Connector type:

JST 2pin PH2.0mm Pitch; Cable Length 5cm

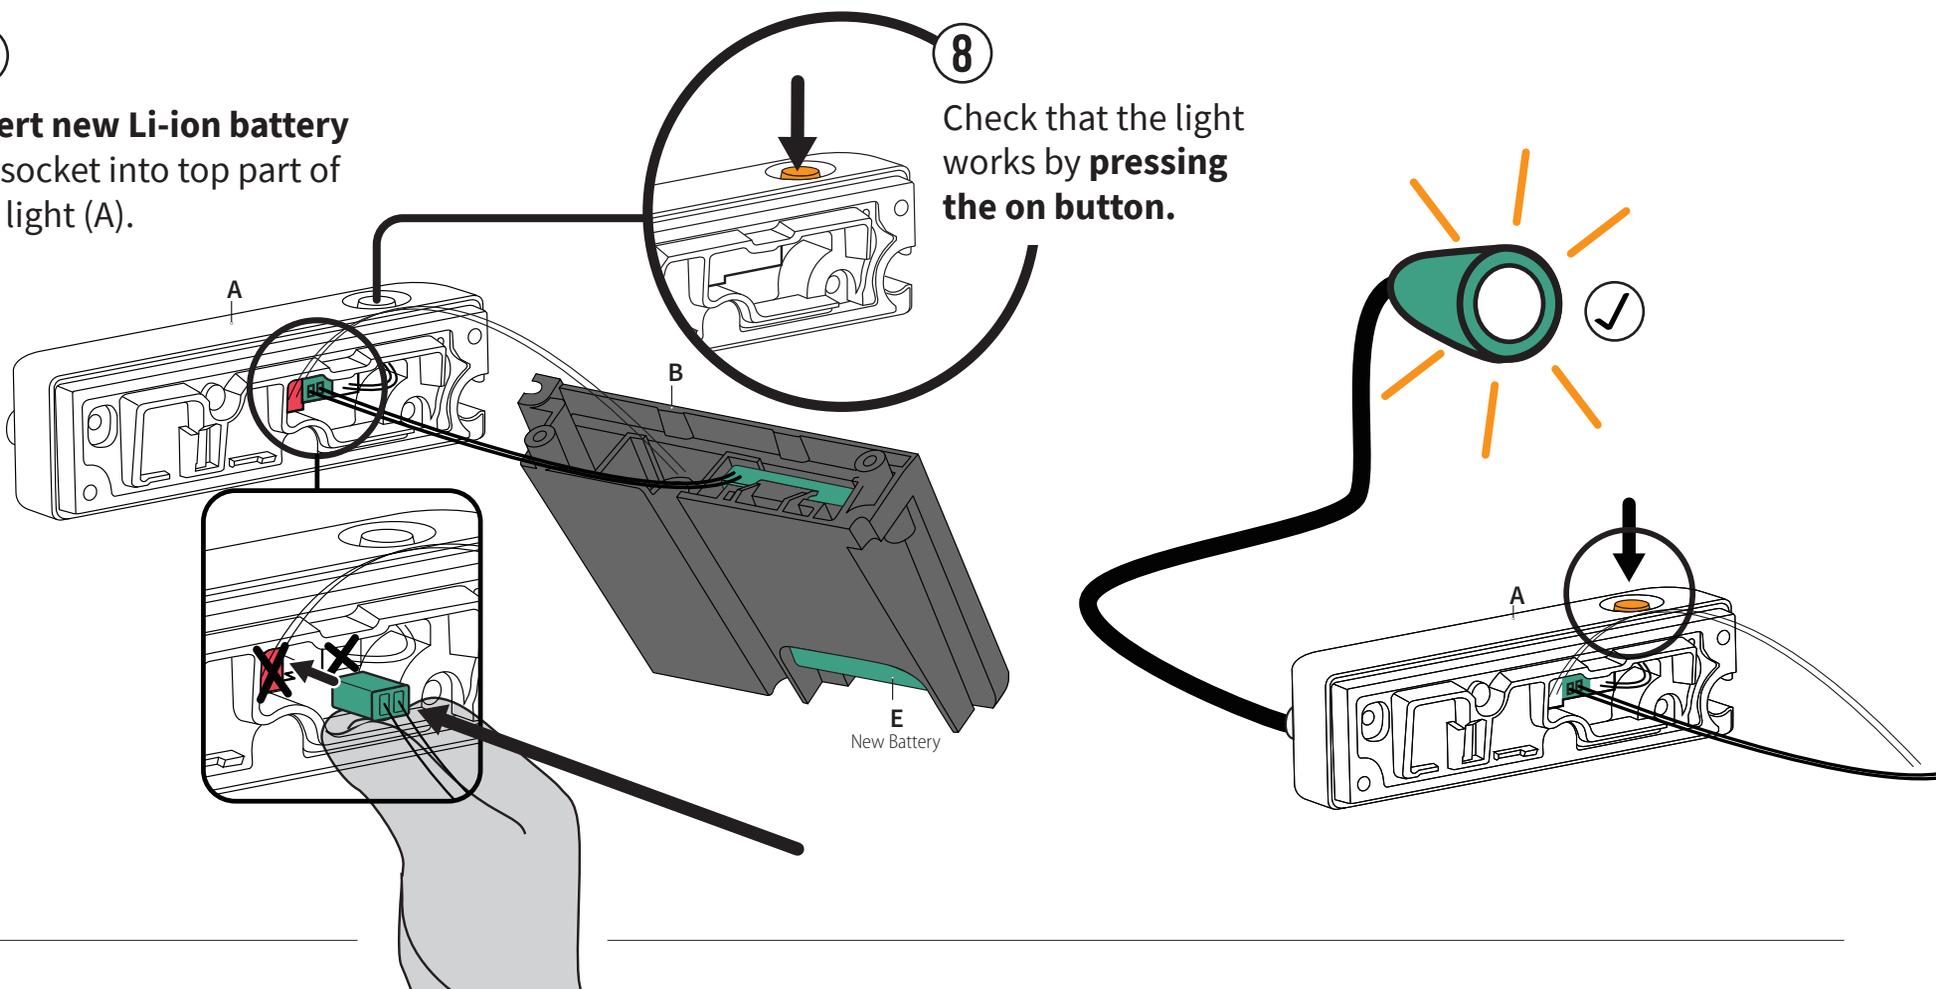

Slide the new Li-ion battery (E) into the inner panel (B) from the bottom and pull socket through the top.

7

Insert new Li-ion battery (E) socket into top part of the light (A).

8

Check that the light works by **pressing the on button.**

9

Push together bottom part (C) and top part (A), keeping middle panel (B) in between.

10

Return the 5 screws to their original holes.
